| github.com/akashvoffi-design

Summary

B.Tech Artificial Intelligence and Data Science student (2024–2028) with hands-on experience delivering 10+ end-to-end AI/ML projects spanning computer vision, deep learning, and full-stack development. Demonstrated ability to design, build, and validate models with measurable results (91% deepfake-detection accuracy, 84% emotion-recognition validation accuracy). JLPT N3 certified in Japanese.

Education

Mahendra Engineering College

B.Tech, Artificial Intelligence and Data Science

2024 – 2028

Namakkal, Tamil Nadu

Sri Gurukulam Secondary School

Higher Secondary (Class XII)

2023 – 2024

Hosur, Tamil Nadu

Technical Skills

Languages: Python, Java, SQL, R

AI/ML: TensorFlow, PyTorch, Scikit-learn, OpenCV, Transformers, LangChain, LLM APIs (Gemini, Claude, GPT-4o)

Web/Full Stack: React 18, Vite, Tailwind CSS, Flask, Supabase, PostgreSQL

Tools: Git, GitHub, Docker, Google Colab, Google Cloud Platform

Internship Experience

Litz Tech

AI/ML Intern

Apr – May 2026

Remote

- Completed a hands-on AI/ML internship applying machine learning workflows to real-world datasets.

Cybernaut Edtech

Python Project Intern

May 2026 – Present

Remote

- Following a 3-month applied curriculum progressing from web scraping to machine learning to Flask/Django deployment; collaborated on the team's Skin Disease Classification project (see Projects).

Projects

MindPulse | *React 18, Flask, Supabase, VGG19* — Solo Project

Aug 2025 – Mar 2026

- Built a full-stack AI mental wellness platform with real-time facial emotion recognition (VGG19 fine-tuned on FER2013), reaching 84% validation accuracy.
- Integrated a Google Gemini voice companion and mood-history dashboards across a React/Flask/Supabase stack.

ShadowHunt | *Python, TensorFlow, OpenCV, Blockchain* — Solo Project

2025

- Built a CNN-based deepfake detection and identity-verification tool achieving 91%+ accuracy across image, video, and audio inputs.
- Implemented Ethereum/IPFS blockchain watermarking for tamper-evident verification.

Skin Disease Classification | *TensorFlow, Keras, CNN* — Team Project, Cybernaut Edtech Internship

2026

- Served as Data & Preprocessing Lead on a team project classifying dermoscopic images (HAM10000 dataset); built the EDA, class-balance analysis, and augmentation pipeline.

SORA AI Agent | *Python, Claude/Gemini API, LiveKit, Whisper* — Solo Project

Jan 2026 – Present

- Designing a Windows-native voice AI agent for real-time speech understanding, screen/camera analysis, and multi-step task automation.

Additional Projects: Agentic RAG architecture (FastAPI, LangChain, ChromaDB, GPT-4o) · Automated Smart Shopping Cart (YOLOv8, IoT sensors, Razorpay checkout) · Sleep Quality Predictor (Logistic Regression, Random Forest, React/Flask) · JLPT Vocabulary Scheduler using Reinforcement Learning (DQN, Gymnasium)

Achievements & Certifications

Best Supportive Student Award – NextGen Awards 2K26 · **2nd Place** – Code Relay 2K26 · **JLPT N3** – Japan Foundation, 2026 · Machine Learning with Python – IBM Developer Skills, 2025 · Tech Trio (C++, Java, Python) – Cybernaut Edtech, 2026
